

Supplementary Table 1. Monthly ratio of IA74 registrations/deaths and its interrupted time series analysis

	Slope before COVID-19 (β_1)	Immediate effect of COVID-19 (β_2)	Gradual slope change after COVID-19 (β_3)	Immediate effect of transitioning to full-scale project (β_4)	Gradual slope change after transitioning to full-scale project (β_5)
Ratio of IA74 registrations/deaths	0.33 (0.05)*	1.23 (1.01)	-0.40 (0.07)*	-1.13 (1.04)	0.27 (0.08)*

The numbers in parentheses represent the standard errors of the estimated coefficients.
 COVID-19, coronavirus disease 2019.

*Indicates statistical significance at $p < 0.05$.
